Skill Java Programming — Assignment 4

9. Find the factorial of a number.

Java file: Factorial.java

```
import java.util.Scanner;

public class Factorial {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a non-negative integer (0 to 20): ");
        int number = sc.nextInt();

        if (number < 0 || number > 20) {
            System.out.println("Please enter a number between 0 and 20.");
        } else {
            long factorial = 1;

            for (int i = 1; i <= number; i++) {
                factorial *= i;
            }

            System.out.println("Factorial of " + number + " = " + factorial);
        }

        sc.close();
    }
}
```
